

1977 SeaCraft located in Monmouth County NJ

20 Foot Master Angler Center Console.

150 HP, 2003 Evinrude Direct Injection.

2012 Sea Lion Trailer Single Axle with brakes.

This boat is being sold as a project boat.

I have owned this boat for eight years.

I am the fourth owner and the wiring is a culmination of 4 owners over many years.

In September of 2015 the transom and motor became submerged. The Evinrude dealer pickled the motor and was able to get the motor running. There are bad fuel injectors that are causing the motor to flood with fuel.

The hull is solid, this boat has the original fuel tank, and original wiring and the doghouse is bolted to the console. The console has cutouts in it from one of the previous owners.

The trailer was only used in the spring and fall to launch and retrieve the boat.

If anyone is interested in a classic hull, here is one.

Asking \$2,800.00
