

SeaCraft

27

The new SeaCraft 27 - no other name is necessary! Featuring the patented VDH hull design, she is like no other twenty-seven footer offered! From the teak and stainless steel bow pulpit, across the colored Awlgrip non-skid deck, safely walk around the roomy cabin gripping the seamless 1" stainless steel bowrail, step down onto the raised helm, move down through the "fish-fighting" cockpit to the transom and peer onto the top of twin OMC 2.6 litre SeaDrives or two of the largest outboards available. You know you are about to experience something "born to the sea". To cruise with 400 gallons of fuel and use the 700 mile cruising range more comfortably, SeaCraft has provided a head, galley, a dinette and berths for four fisherman below decks.

During all design phases, hardware and material selection and attention to construction detail, the traditional SeaCraft "fishthink" was employed.

Don't cheat yourself, experience this SeaCraft!!!
